

스토리보드 생성 프롬프트 (모델: Nanobanana Pro)

Create one cohesive clay stop-motion storyboard image using the seven uploaded references.

REFERENCE ROLES

Image 1: the exact reference for mood, lighting, color palette, handmade clay material quality, tactile surface texture, and miniature stop-motion atmosphere.

Image 2: the exact character reference for HEADY, the protagonist.

Image 3: the exact character reference for the SUPERVISOR.

Image 4: the exact character reference for TEAMMATE 01.

Image 5: the exact character reference for TEAMMATE 02.

Image 6: the exact reference for the meeting room: walls, door, furniture, chairs, whiteboard, blueprint, laptop, props, set dressing, and the MASTER DRAWING.

Image 7: a top-down floor plan that fixes where every character and key prop is located. Image 7 is a diagram only: do not render its outlines, colored circles, icons, or text labels.

Images 2 to 5 are character sheets: use only the characters themselves. Do not render sheet layouts, labels, dividers, or cream sheet backgrounds.

OUTPUT FORMAT

The final output must be ONE horizontal 16:9 widescreen image.

Divide the full 16:9 canvas into exactly four equal quadrants in a strict 2×2 layout:

top-left,

top-right,

bottom-left,

bottom-right.

Each quadrant must occupy exactly one quarter of the total canvas.

The four images must touch directly edge-to-edge.

No panel frames.

No borders.

No gutters.

No cream separators.

No white margins.

No outer margins.

No title areas.

No panel labels.

No captions.

No subtitles.

No speech bubbles.

No logos.

No watermarks.

No graphic overlays.

Treat the four quadrants as four consecutive cinematic shots from the same clay stop-motion film, read in this order:

top-left → top-right → bottom-left → bottom-right.

The entire image should look like photographed frames from a real handcrafted clay stop-motion miniature set, not polished CGI.

STYLE

Cozy, innocent, slightly dopey, quietly funny, empathetic, understated.

Warm neutral diffused lighting.

Gentle fill.

Soft shadows.

Moderate contrast.

Creamy highlights.

Color palette:

cream beige,

earthy brown,

muted lavender,

muted plum,

soft ochre,

muted green,

muted dusty blue for the blueprints and the laptop screen,

restrained saturation.

Use cinematic miniature photography with:

natural lens perspective,

selective depth of field,

soft optical falloff,

realistic miniature-scale lighting,

subtle macro-photography characteristics.

The lighting must remain spatially consistent across all four shots.

STRONG CLAY TEXTURE

Strong handmade clay tactility is essential.

Clearly show:

strong fingerprint ridges,
thumb-pressed dents,
finger pressure marks,
sculpting-tool grooves,
small scrape marks,
joined clay seams,
compressed edges,
slight smearing,
uneven hand-shaped surfaces,
tiny lumps,
soft deformation,
imperfect geometry.

Do not stylize the clay too cleanly.

These clay imperfections must be clearly visible on characters, furniture, walls, whiteboard, blueprints, chalk strokes, props, and background surfaces.

ABSOLUTE UNIVERSAL CLAY RULE

EVERY visible element inside the frame must be made from clay or clay-like sculpted material:

all characters, hair, clothing, accessories, the whiteboard and its stand, the blueprint, chalk, chalk strokes, the table, chairs, laptop, laptop screen, papers, sticky notes, pencils, walls, floor, door, shelves, and every tiny detail.

The only exception is the characters' eyes: every character has real craft googly eyes with white backing disks, thin pale rims, shallow transparent plastic domes, and separate flat black pupil disks, exactly as shown in the character sheets.

Otherwise, there must be no realistic non-clay materials anywhere.

The blueprint is a thin dusty-blue clay slab with thin, neat, raised white clay lines.

Chalk strokes are thicker, rougher, hand-rolled white clay strokes pressed onto the slab, with small crumbs at their ends. The difference between the neat blueprint lines and the rough chalk strokes must be clearly visible.

CHARACTER SPECIES RULE

All four characters belong to the same fictional clay-creature species: approximately three-head-tall, rounded toy-like clay bodies, large plastic craft googly eyes, simplified sculpted features, short stylized limbs.

Each character must match their own reference sheet exactly. No clones. No swapped colors, hair, clothing, or accessories between characters.

CHARACTERS

HEADY — match Image 2: lavender clay body, messy plum hair with a pencil tucked in, round ochre glasses, orange crossbody satchel.

SUPERVISOR — match Image 3 exactly in body color, head shape, hair, clothing, and accessories.

TEAMMATE 01 — match Image 4: middle-aged man, grape-purple body clearly darker than Heady, side-swept charcoal hair, heavy half-lidded eyelids, cream collared shirt, dark-purple necktie.

TEAMMATE 02 — match Image 5: young man, pale grayish mint-sage green body, egg-shaped head, spiky navy hair coils, thick pouty coral lips, dusty-blue polo shirt.

SET & POSITIONS — FOLLOW IMAGES 6 AND 7

The room, furniture, and props match Image 6.

Every position matches Image 7:

The large presentation whiteboard with the blueprint stands near the back wall, slightly right of center.

The SUPERVISOR stands to the left of the whiteboard, between the door and the whiteboard.

The rounded-rectangle meeting table is in the center of the room.

TEAMMATE 02 sits on the left side of the table, next to the laptop.

TEAMMATE 01 sits on the right side of the table, next to the blueprint sheet.

HEADY sits at the near end of the table, facing the whiteboard, in front of the sticky notes and scattered pencils.

THE MASTER DRAWING

The blueprint on the whiteboard shows the MASTER DRAWING from Image 6: a front elevation of a tall, slender seven-floor tower with a stepped silhouette that narrows twice, a top floor cantilevering to the right, X-shaped cross-bracing on the lower three floors, a small arched entrance at the base, and a thin antenna mast.

The same MASTER DRAWING also appears on the table blueprint sheet and the laptop screen.

THE CHALK SUPPORT

The SUPERVISOR adds one specific structure in chalk: a wide A-shaped chalk truss hugging the lower three floors of the tower. Two long diagonal chalk struts lean in from the ground on the left and right sides and meet the tower at the third floor, connected by two horizontal chalk beams with one chalk X-brace between them.

This chalk structure must keep exactly the same shape in every quadrant where it appears.

QUADRANT 1 — TOP LEFT

Wide full shot of the entire meeting, from a high three-quarter angle behind HEADY, matching the camera of Image 6.

All four characters are placed exactly according to Image 7.

The SUPERVISOR stands to the left of the whiteboard, reaching toward the lower part of the blueprint with a stick of white clay chalk, partway through drawing THE CHALK SUPPORT.

TEAMMATE 01 and TEAMMATE 02 sit at their sides of the table, turned toward the whiteboard, watching with tired, doubtful faces.

HEADY sits at the near end of the table, seen mostly from behind and slightly to the side, recognizable by the plum hair with the pencil tucked in and the orange satchel strap.

Clearly establish:

room geometry,

whiteboard position,

supervisor position,

table and chair positions,

every character's seat.

Mood: quiet, tired, hopeful effort.

QUADRANT 2 — TOP RIGHT

Close-up of the lower half of the blueprint on the whiteboard.

The SUPERVISOR's clay hand holds a stick of white clay chalk, pressing it against the blueprint to finish the last short stroke of THE CHALK SUPPORT.

The rest of THE CHALK SUPPORT is already drawn: thick, rough, hand-rolled white clay strokes wrapped around the lower three floors of the tower.

The tower drawing above is still standing, intact and upright.

Small clay chalk crumbs cling to the tip of the chalk and fall onto the tray below.

The framing must be designed so the exact same composition can be reused in Quadrant 3.

Mood: focused, careful, faintly hopeful.

QUADRANT 3 — BOTTOM LEFT

The exact same close-up framing as Quadrant 2.

The tower drawing has collapsed in a cartoonish way.

The thin, neat white clay lines of the tower have peeled off the blueprint and slumped down like limp noodles, sliding into a tangled heap at the bottom edge of the blueprint. A few lines still dangle mid-slide. A couple of tiny clay crumbs hang in the air mid-fall.

Where the tower used to be, only a faint pale ghost outline remains, impressed in the clay slab.

THE CHALK SUPPORT remains exactly where it was drawn, completely intact, same shape as Quadrant 2, now standing alone and supporting nothing.

The SUPERVISOR's hand stays frozen at the edge of the frame, the chalk lifted just off the board.

The collapse should feel comic, limp, and deflating, never explosive.

No speed lines.

No motion-blur graphics.

No dust clouds.

QUADRANT 4 — BOTTOM RIGHT

The SUPERVISOR's point-of-view shot, from his standing position to the left of the whiteboard, looking down the length of the table from a slightly high standing eye level.

Because the camera now faces the opposite direction from Quadrant 1:

TEAMMATE 02 appears on image right, closest to the camera,

TEAMMATE 01 appears on image left, across the table,

HEADY appears in the center at the far end of the table, facing the camera.

A clear three-shot: all three are fully readable. No one is cut off, and no one blocks another.

All three react with headache-like frustration, each in their own way:

TEAMMATE 02 clutches his head with both hands, eyes wide, pouty lips pressed tight,

TEAMMATE 01 rubs his forehead with one hand, eyes shut in weary disbelief,

HEADY slumps with his chin on the table, glasses slightly askew, staring blankly with an innocent, vacant, tired expression.

The table props match Image 6: the laptop showing the MASTER DRAWING, the blueprint sheet, the sticky notes, and the scattered pencils in front of HEADY.

The humor should be quiet, awkward, and deadpan, not exaggerated.

CONTINUITY

All four shots belong to one continuous scene.

Preserve:

the same four characters and their exact designs,

the same room, whiteboard, table, chairs, and props,

the same MASTER DRAWING,
the same CHALK SUPPORT shape in Quadrants 1, 2, and 3,
the same lighting direction, color grade, clay texture, and miniature scale.

Quadrants 2 and 3 share the exact same framing.

Quadrant 4's left/right placement is mirrored from Quadrant 1 because the camera faces the opposite way.

FINAL PRIORITY ORDER

1. One horizontal 16:9 widescreen image
2. Exactly four equal edge-to-edge quadrants in a strict 2×2 layout
3. No frames, borders, gutters, margins, labels, or panel text
4. Every character matches their own reference sheet
5. Positions match Image 7
6. Room and props match Image 6
7. Everything is clay except the plastic googly eyes
8. Strong visible clay texture and handmade imperfections
9. THE CHALK SUPPORT keeps the same shape across Quadrants 1 to 3
10. Quadrants 2 and 3 share identical framing
11. Clear sequential storytelling
12. Quiet deadpan clay stop-motion comedy

NEGATIVE PROMPT

No portrait canvas.

No square format.

No uneven quadrant sizes.

No panel frames.

No borders.

No gutters.

No margins.

No labels.

No captions.

No speech bubbles.

No logos.

No watermarks.

No UI.

No graphic overlays.

No speed lines.

No character-sheet layouts.

No floor-plan graphics.

No colored circles.

No text labels from the references.

No realistic humans.

No clones.

No swapped character designs.

No changing characters between shots.

No extra characters.

No clay eyes without plastic domes.

No realistic paper, plastic objects, metal, glass, or wood.

No polished CGI.

No glossy 3D-render look.

No perfectly smooth clay.

No different MASTER DRAWING between the whiteboard, table sheet, and laptop.

No different CHALK SUPPORT shape between quadrants.

No explosion.

No dust clouds.

No extra limbs.

No extra hands.

컷 생성 프롬프트 (모델: Seedance 2.5)

A 15-second clay stop-motion scene, 16:9. Handmade plasticine puppets on a miniature architectural-office set, photographed frame by frame.

REFERENCES

@Image1 is the exact first frame. It defines the room, the character positions, the props, the lighting, and the clay texture for the entire video.

@Image2, @Image3, @Image4, and @Image5 are character sheets for identity and detail only. Never use them as frames, never cut to them, and never show their layouts, labels, dividers, or cream backgrounds.

Throughout this prompt, each character is called by their reference tag.

MATCHING EACH CHARACTER IN @Image1 TO THEIR SHEET

The @Image3 character is the one standing beside the whiteboard: green hair, glasses, rust-brown cardigan.

The @Image5 character is the one seated on the left side of the table: mint-green skin, spiky navy hair, dusty-blue polo shirt.

The @Image4 character is the one seated on the right side of the table: mauve skin, side-swept charcoal hair, cream shirt, purple necktie.

The @Image2 character is the one seated at the near end of the table, closest to the camera, seen only from behind: a large mass of messy plum hair with a yellow pencil tucked into it, and an orange satchel strap across a lavender back. This back view matches the BACK view on the @Image2 sheet. His face is hidden in @Image1. When his face is revealed later, it must match the FRONT view and expressions on the @Image2 sheet exactly: round orange glasses, large googly eyes, and the same face shape.

All characters have plastic craft googly eyes. Every character keeps the exact face, eyes, glasses,

hair, clothing, colors, and proportions of their own sheet in every beat, especially in angles not visible in @Image1.

FLOW

Let the scene flow as one continuous piece of storytelling. Between the beats below, choose the most natural transition yourself: a continuing camera move, a reframe, or a clean cut. Keep space, characters, props, and lighting continuous across every transition, so the whole video feels like one scene rather than separate clips.

THE BLUEPRINT

A dusty-blue clay slab clipped to the whiteboard, showing a tall stepped tower in thin raised white clay lines. It narrows as it rises, its top floor cantilevers to the right, a thin antenna stands on the roof, X-bracing crosses the lower floors, and a small arched entrance sits at the base.

Beat 1 — The presentation (about 3 seconds):

Starting on @Image1, the @Image3 character points at the tower with a stick of white clay chalk as if presenting, while the other three watch. A very slow push-in toward the whiteboard.

Beat 2 — The new support (about 3 seconds):

Close on the lower half of the blueprint. The @Image3 character's clay hand draws a thick, rough chalk support at the lower left of the tower, from the tower's side down to the ground line, leaving small crumbs. The chalk stroke is clearly thicker and rougher than the neat blueprint lines.

Beat 3 — The collapse (about 4 seconds):

Hold the same close framing as Beat 2, with no cut. The hand pauses. The tower's weight presses down, the right-hand strut buckles and snaps, and the whole tower above slumps and slides down the blueprint like limp noodles, piling into a tangled heap at the lower right. Only a faint ghost outline of the tower remains, with the new chalk support standing alone, supporting nothing. Limp and cartoonish, soft rather than explosive.

Beat 4 — Back to work (about 5 seconds):

The reverse angle, seen from where the @Image3 character stands beside the whiteboard, looking down the table.

The @Image4 character is on image left.

The @Image5 character is on image right.

In the center, at the far end of the table, facing the camera, sits the @Image2 character: the same one who sat with his back to the camera in @Image1, now seen from the front for the first time, matching the FRONT view of @Image2.

All three faces are clearly visible.

The blueprint sheet lies in front of the @Image4 character, the laptop in front of the @Image5 character, and sticky notes and scattered pencils in front of the @Image2 character.

All three sink in despair for a beat. Then, staggered naturally, the @Image4 character sighs and pulls the blueprint sheet toward himself to start reworking it, while the @Image5 character drags the laptop closer and starts typing. The @Image2 character stays slumped with his chin on the table, staring blankly straight ahead without moving, his mind somewhere else.

STYLE

Warm diffused lighting, muted earthy colors, strong handmade clay texture with visible fingerprints, pressed surfaces, sculpted hair, and soft irregular edges. Characters move with subtle stop-motion puppet acting and a gentle frame-by-frame cadence, while camera moves stay smooth. The blueprint and all props stay stable and consistent. Clean frame with no on-screen text.

SOUND

No dialogue, no music. Quiet office room tone, soft chalk scraping in Beat 2, a rubbery clay creak and a limp, squishy slump in Beat 3, a small sigh, rustling paper, and soft keyboard taps in Beat 4.
