

스토리보드 생성 프롬프트 (모델: Nanobanana Pro)

Create one cohesive clay stop-motion storyboard image using the uploaded references.

Use Image 1 as the exact reference for mood, lighting, color palette, handmade clay material quality, tactile surface texture, and miniature stop-motion atmosphere.

Use Image 2 as the exact reference for the protagonist's character design, proportions, colors, face, hair, glasses, accessories, and overall identity.

The final output must be ONE horizontal 16:9 widescreen image.

Divide the full 16:9 canvas into exactly four equal quadrants in a strict 2×2 layout:

top-left,

top-right,

bottom-left,

bottom-right.

Each quadrant must occupy exactly one quarter of the total canvas.

The four images must touch directly edge-to-edge.

No panel frames.

No borders.

No gutters.

No cream separators.

No white margins.

No outer margins.

No card layout.

No poster layout.

No title areas.

No panel labels.

No "PANEL 1", "PANEL 2", "PANEL 3", or "PANEL 4".

No captions.

No subtitles.

No speech bubbles.

No logos.

No watermarks.

No graphic overlays.

Treat the four quadrants as four consecutive cinematic shots from the same clay stop-motion film, read in this order:

top-left → top-right → bottom-left → bottom-right.

The entire image should look like photographed frames from a real handcrafted clay stop-motion miniature set, not polished CGI.

STYLE

Cozy, innocent, slightly dopey, quietly funny, empathetic, understated.

Warm neutral diffused lighting.

Gentle fill.

Soft shadows.

Moderate contrast.

Creamy highlights.

Color palette:

cream beige,

earthy brown,

muted lavender,

muted plum,

soft ochre,

muted green,

restrained saturation.

Use cinematic miniature photography with:

natural lens perspective,

selective depth of field,

soft optical falloff,

realistic miniature-scale lighting,

subtle macro-photography characteristics,

gentle background blur where appropriate.

The lighting must remain spatially consistent across all four shots.

STRONG CLAY TEXTURE

Strong handmade clay tactility is essential.

Make the clay texture unmistakably visible and prominent across the entire image.

Clearly show:

strong fingerprint ridges,

thumb-pressed dents,

finger pressure marks,

sculpting-tool grooves,

small scrape marks,

drag marks from shaping tools,

joined clay seams,

compressed edges,

slight smearing,

uneven hand-shaped surfaces,

tiny lumps,

irregular rounded forms,

soft deformation,
imperfect geometry.

Do not stylize the clay too cleanly.

The entire set should proudly display obvious evidence of having been physically touched, pressed, shaped, assembled, and sculpted by hand.

These clay imperfections must be clearly visible not only on characters, but also on furniture, walls, props, drawings, pens, models, and background surfaces.

Do not smooth away fingerprints, dents, tool marks, seams, or irregularities.

ABSOLUTE UNIVERSAL CLAY RULE

EVERY visible element inside the frame must be made from clay or clay-like sculpted material.

This includes:

all characters,

skin,

bodies,

hair,

glasses,

clothing,
accessories,
bags,
pencils,
ballpoint pens,
architectural drawings,
paper sheets,
drawing lines,
architectural model,
table,
chairs,
walls,
floor,
ceiling,
windows,
window frames,
doors,
bookshelves,
books,
plants,
office furniture,
office fixtures,
floating letters,
background architecture,

and every tiny environmental detail.

There must be no realistic non-clay materials anywhere.

No realistic paper.

No real plastic.

No real metal.

No real wood.

No glass.

No fabric.

No realistic skin.

Objects should remain recognizable as those objects, but they must clearly appear as handmade clay interpretations.

For example:

a ballpoint pen should still read clearly as a pen, but its barrel, clip, tip, and details must visibly look sculpted from clay.

Architectural drawings should still read as drawings on sheets, but the sheets should appear as thin clay slabs with slightly uneven edges, and the drawn lines should appear impressed, carved, or sculpted into the clay surface.

The entire office must read as one cohesive physically built clay miniature environment.

CHARACTER SPECIES RULE

Every character in the storyboard must belong to the same fictional clay-creature species as the protagonist.

Do not use realistic humans.

The protagonist, team leader, and all coworkers must share the same fundamental species design language:

approximately three-head-tall proportions,

rounded toy-like clay bodies,

compact rounded heads,

large handmade googly-style eyes,

simplified sculpted facial features,

short stylized limbs,

soft handmade anatomy,

slightly awkward innocent physicality,

and tactile hand-sculpted clay construction.

All characters should clearly look like members of the same fictional species and the same visual universe.

However, do NOT make the coworkers into clones of the protagonist.

Each coworker and the team leader must have their own distinct identity using:

- different muted clay body colors,
- different clay or yarn-like hairstyles,
- different clothing colors,
- different glasses or no glasses,
- different accessories,
- slightly varied head shapes,
- slightly varied facial proportions,
- different expressions,
- and clearly distinguishable silhouettes.

They should look like different individuals of the same species.

PROTAGONIST

Match Image 2 as closely as possible.

The protagonist is:

- approximately three heads tall,
- lavender clay body,
- smooth unclothed toy-like form,
- messy tangled plum-colored clay or yarn-like hair,
- a pencil tucked into the hair,

round ochre glasses,
white googly eyes,
orange crossbody satchel,
same established drawing accessories,
same facial proportions,
same overall silhouette.

The protagonist must remain exactly recognizable and consistent across all four shots.

Do not change:

body proportions,
body color,
hair design,
glasses,
satchel,
facial structure,
or silhouette.

Maintain the same team leader, coworkers, meeting room, table, architectural model, drawings, pens, furniture, props, and overall set design throughout all four shots.

QUADRANT 1 — TOP LEFT

High-angle wide establishing shot of an architectural office meeting.

A team of clay creatures gathers around a large clay meeting table.

All characters are the same fictional species as the protagonist.

The table is covered with:

clay architectural drawings,

a clay building model,

scattered clay ballpoint pens.

The team leader gestures toward a difficult architectural design while explaining something.

Coworkers look mentally strained or concentrated:

some lean over the plans,

one may hold their head,

others study the drawings.

The protagonist sits centrally within the group.

The protagonist is not paying full attention and absentmindedly fiddles with a clay ballpoint pen.

Expression:

blank,

innocent,

slightly vacant,

quietly dopey.

Clearly establish:

room geometry,

table orientation,

leader position,

protagonist position,

coworker positions,

architectural model placement,

drawing placement,

and pen placement.

This shot establishes objective physical reality.

QUADRANT 2 — TOP RIGHT

Medium shot from the seated protagonist's point of view across the same table.

Show the exact same team leader from Quadrant 1.

The leader is frozen mid-explanation:

mouth slightly open,

one hand naturally raised.

Small three-dimensional handmade clay letterforms emerge near the leader's mouth and scatter through the air.

The floating letters must look like physical clay objects inside the imagined space.

They are not:

subtitles,

captions,

graphic typography,

UI elements,

or digital overlays.

Keep the clay letterforms in sharp focus while the leader becomes gently optically blurred behind them.

The effect should visually express the protagonist mentally drifting away while still hearing the leader speak.

Keep the effect subtle, poetic, and grounded in the clay miniature world.

Do not make it psychedelic.

Maintain the same room, lighting, table, leader design, and species continuity.

This shot represents subjective distraction.

QUADRANT 3 — BOTTOM LEFT

Close-up of the tabletop from the protagonist's subjective point of view.

Several clay ballpoint pens appear to be mysteriously assembling themselves into a strange improvised architectural tower above the clay drawings.

Create a distinctive, memorable tower design.

The tower should include:

interlocking pens,

intersecting diagonals,

small cantilevers,

an asymmetrical tripod-like base,

precarious balance,

a clearly readable silhouette.

Several pens are already connected into the structure.

Two additional clay pens hover just above the tower as if they are about to place themselves.

No hands touch the pens.

A few softly blurred clay letterforms from Quadrant 2 may linger faintly in the distant background.

The tower must be designed so that the exact same structure can appear again in Quadrant 4.

The pens must visibly look sculpted from clay, with:

fingerprints,

dents,

seams,

tool marks,

and handmade irregularities.

This shot represents subjective distraction.

QUADRANT 4 — BOTTOM RIGHT

Frontal medium-wide shot returning clearly to objective physical reality.

Show the protagonist at the same meeting table.

The exact same distinctive pen tower from Quadrant 3 now physically stands on the table.

Match the tower as closely as possible:

same number of pens,

same pen colors,

same orientation,

same intersections,

same tripod-like base,

same silhouette.

The protagonist's hand is paused directly above the top of the tower while holding the final clay pen.

This reveals that the protagonist has actually been constructing the tower absentmindedly during the meeting.

Body language:

shoulders slightly raised,

body frozen mid-action.

Expression:

mouth barely open,

eyes glancing sideways,

confused,

mildly embarrassed,

innocently caught in the act.

The humor should be quiet, awkward, and deadpan, not exaggerated.

The same team leader and coworkers from Quadrant 1 have stopped working.

They are silently staring at the protagonist and the pen tower.

All coworkers must remain the same species and the same individual characters established earlier.

No floating letters.

No levitating pens.

No supernatural effects.

Everything now follows physical reality.

CONTINUITY

All four shots must clearly belong to one continuous scene.

Preserve:

the same protagonist,

the same team leader,

the same coworkers,

the same coworker body colors,

the same hairstyles,

the same clothing,

the same accessories,

the same room,

the same table,

the same architectural model,

the same drawings,

the same props,

the same lighting direction,

the same color grade,

the same clay texture,

and the same miniature scale.

The team leader in Quadrant 2 must be exactly the same individual as the leader in Quadrants 1 and 4.

The coworkers in Quadrant 4 must match the coworkers established in Quadrant 1.

The pen tower in Quadrant 4 must match the tower in Quadrant 3.

Quadrants 1 and 4 = objective physical reality.

Quadrants 2 and 3 = the protagonist's subjective distraction.

The subjective shots must still feel physically connected to the same room and clay world.

FINAL PRIORITY ORDER

1. One horizontal 16:9 widescreen image
2. Exactly four equal edge-to-edge quadrants in a strict 2×2 layout
3. No frames, borders, gutters, margins, labels, or panel text
4. Protagonist matches Image 2 consistently
5. Every character belongs to the same fictional clay-creature species
6. Coworkers remain individually distinct, not protagonist clones
7. Everything visible is made from clay
8. Strong visible fingerprint ridges, dents, sculpting-tool marks, seams, and handmade imperfections
9. Exact character continuity across all four shots

10. Exact pen-tower continuity between Quadrants 3 and 4
11. Consistent room, lighting, palette, and miniature scale
12. Clear sequential storytelling
13. Quiet deadpan clay stop-motion comedy

NEGATIVE PROMPT

- No portrait canvas.
- No vertical composition.
- No 4:5 format.
- No square format.
- No poster layout.
- No storyboard sheet styling.
- No comic-page template.

- No uneven quadrant sizes.
- No panel frames.
- No panel borders.
- No gutters.
- No cream separators.
- No white margins.
- No outer margins.
- No title area.
- No header area.

No PANEL 1.

No PANEL 2.

No PANEL 3.

No PANEL 4.

No labels.

No captions.

No subtitles.

No speech bubbles.

No logos.

No watermarks.

No UI.

No graphic overlays.

No realistic humans.

No human coworkers.

No realistic human faces.

No realistic human anatomy.

No mixed human-and-creature cast.

No protagonist clones.

No identical coworkers.

No duplicated protagonist.

No changing species between shots.

No changing team leader.

No changing coworker designs.

No realistic paper.

No plastic pens.

No realistic wood.

No metal.

No glass.

No fabric.

No realistic skin.

No non-clay background materials.

No polished CGI.

No glossy 3D-render look.

No perfectly smooth clay.

No perfectly clean geometry.

No textureless surfaces.

No loss of fingerprint ridges.

No loss of thumb dents.

No loss of sculpting-tool marks.

No loss of clay seams.

No different room between shots.

No inconsistent furniture.

No inconsistent lighting.

No inconsistent color grading.

No different pen tower in Quadrant 4.

No different pen count.

No different tower silhouette.

No floating letters in Quadrant 4.

No levitating objects in Quadrant 4.

No extra limbs.

No extra hands.

No random extra characters.

컷 생성 프롬프트 (모델: Seedance 2.5)

Use the supplied image as the exact first frame. A single continuous 5-second cinematic clay stop-motion shot. Preserve all five characters, their positions, accessories, office setting, drawings, pencils, and architectural model.

Perform a slow, restrained forward dolly toward the central lavender protagonist

with yellow glasses and messy plum hair. Travel a short distance, maintaining the original elevated camera height, downward angle, and fixed focal length. Show subtle foreground parallax. End with a slightly tighter composition centered on the protagonist, keeping the neighboring teammates partially visible. Gently ease to a stop.

During the move, the protagonist keeps the pencil in his right hand near the tabletop and slowly raises his free left hand to his temple. His shoulders slump slightly, his mouth hangs barely open, and he stares blankly at the unresolved design.

The green-haired teammate draws the extended hand back toward the forehead. The blue-shirted teammate lowers his head slightly, while the foreground teammates make small, weary posture adjustments. Stagger their movements naturally. Convey quiet frustration, mental exhaustion, and gentle deadpan humor.

Preserve warm diffused lighting, muted earthy colors, and strong handmade clay texture: visible fingerprints, pressed surfaces, sculpted hair, and soft irregular edges. Subtle stop-motion puppet acting with a smooth camera move.

No cuts, digital zoom, camera shake, exaggerated gestures, floating props, character morphing, flickering, captions, or watermarks.
